

Fungi Alternatives

Consulting Startup Checklist

About what I do

Fungi Alternatives is an independent consulting company that focuses on the entire process of producing mushrooms, from the production of substrate in all three phases to the cultivation and harvest in the cells. My unique combination of knowledge allows me to approach problems from various perspectives. I will consider both the substrate and cultivation process enabling myself to provide a wide range of solutions for you and your team to follow for all troubleshooting needs. I will list the prerequisite and items needed for you to purchase before moving on to setting up your area.

Committed to helping your business

Fungi Alternatives can be exactly what you need to get your mushroom farm running. I can be of assistance to training you for only a simple hobby or even for a fully functional business. Let me be your ally when you have questions when you're ready to grow mushrooms in bulk.

If permitted, I will need to see your existing area or grow space or actual design of total diameter of room with height included. I will listen to your vision about the mushroom farm you are wanting to build, and I will critique what will need to be changed or modified. You will be provided with options and methods to buildout or reconstruct. I will deliver a clear, concise action plan that will be written out so you know exactly how to prepare your space for success. Fungi Alternatives will help you develop a system that works best for you.

With my Mushroom Cultivation Consultant service, you can expect:

- Design reviews and recommendations for sterile lab optimization.
 - Design reviews and recommendations for grow room optimization.
 - Recommendations for preferred environmental parameters for each species. •
- Acquisition of high-quality strains for bulk production.
- Cultivation coaching and training program development for you and your team.
